Other parameters may be specified. Please consult factory for any deviation from standard.

*Other topologies are available upon request or design need. These can include, but are not limited to: Gaussian, Butterworth, Bessel, Elliptical, and Pole-placed designs.

**Other impedances can be achieved, but the package is designed as a 50 Ohm unit. Matching to any other impedance will need prior approval and may not be guaranteed.

***Dependant upon frequency range and design requirements. Exact size to be quoted by factory.

Any environmental testing will incur additional charges. Consult factory for costs associated with environmental testing. All filters can be "Designed to" and may not require the additional testing. Each application will be different.
